

BCG case study (UI screenshots)

1. View policies page

2. Edit policy

The screenshot shows a web application interface for a 'Finance Client'. At the top, there are navigation buttons for 'Policies' and 'Visualiz'. A modal window titled 'Edit Policy details' is open, featuring a close button (X) in the top right corner. The modal contains several form fields: a text input for 'Premium' with the value '1598', a dropdown menu for 'Fuel' set to 'CNG', a dropdown menu for 'Vehicle segment' set to 'A', and a dropdown menu for 'Region' set to 'West'. Below these are five checkboxes for insurance coverage: 'Bodily Injury Liability' (unchecked), 'Personal Injury Protection' (checked), 'Property Damage Liability' (checked), 'Collision' (unchecked), and 'Comprehensive' (unchecked). At the bottom right of the modal are 'Save' and 'Cancel' buttons. The background shows a blurred view of a policy list with columns for 'Policy', 'Customer', 'Premium', 'Income', 'Date', and 'Status'. Visible data includes a premium of '\$25-\$70K', a gender of 'MALE', and a region of 'North'.
